

DINCEL
STRUCTURAL WALLING

TESTIMONIAL

LOCATION BARWON HEADS VIC • **TYPE** RESIDENTIAL • **ARCHITECT** KIRBY ARCHITECTS • **BUILDER** DAVID MCDONALD

KIRBY ROPER • KIRBY ARCHITECTS

As the architect on our Humble Street project in Barwon Heads, we were really impressed with the Dincel load-bearing walling system we used for the subfloor retaining walls. It made a huge difference in speeding up the construction process, allowing us to start placement early and cut down the overall build time, which also helped reduce material costs. The Dincel system, with its patented polymer formwork, gave us a solid, durable, and waterproof solution, all while meeting Australian standards for fire safety. We're really happy with how it all came together!
